

Staying ahead of cyber threats

How Aspire Wealth Group goes above the standard protections to keep its client data secure.

Your security is our priority

Field Effect, an Ottawa-based cybersecurity company and HostedBizz, an Ottawa-based cloud service provider are proud to work alongside Aspire Wealth Group to deliver complete cybersecurity protections. Together, our goal is to ensure your data remains secure and that you can rely on Aspire Wealth Group without interruption due to cyber threats.

In the last five years, cybercrime has exploded, to the point where even small-to-midsized businesses have started to experience cyber-attacks. Between phishing emails, ransomware, email compromise, and other common attacks continuing to increase, Aspire Wealth recognized its responsibility to do more than trust baseline protection to keep its clients and their valued data secure.

With Field Effect Managed Detection and Response (MDR) paired alongside service management from HostedBizz, Aspire Wealth has premium cybersecurity in place to stay ahead of modern cyber threats.

Aspire Wealth Group has complete cybersecurity coverage

When it comes to protecting valued client data, visibility and risk management are top priorities. Aspire Wealth leverages Field Effect MDR to watch over its entire IT ecosystem and spot any potential weaknesses or threats, leaving no security gaps.

The system checks all accounts, systems, software, and unexpected user actions, and immediately identifies any threats that could put Aspire Wealth's data at risk. And if a risk is identified, it is proactively stopped in its tracks before any harm can be done.

Complete cybersecurity coverage protects:

Employee
Devices

Cloud Apps

Network

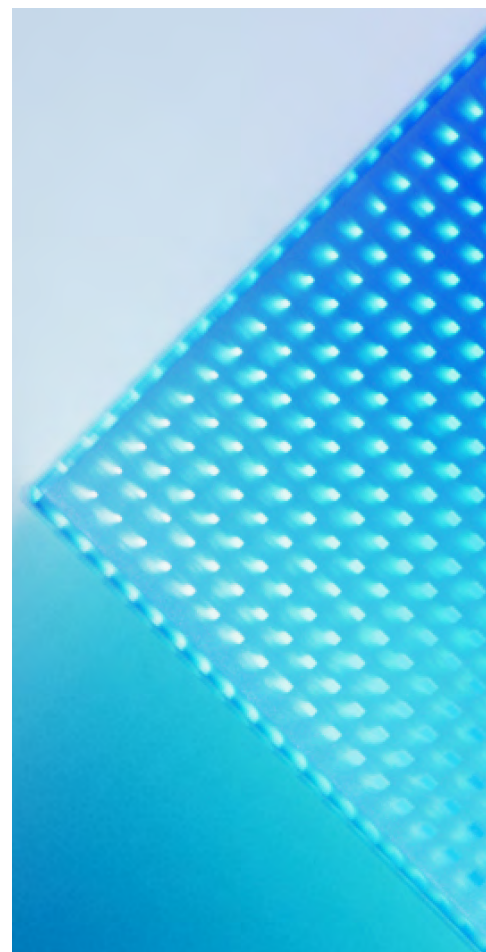

Email

Web

IoT

FIELD EFFECT

Taking a layered approach to protection

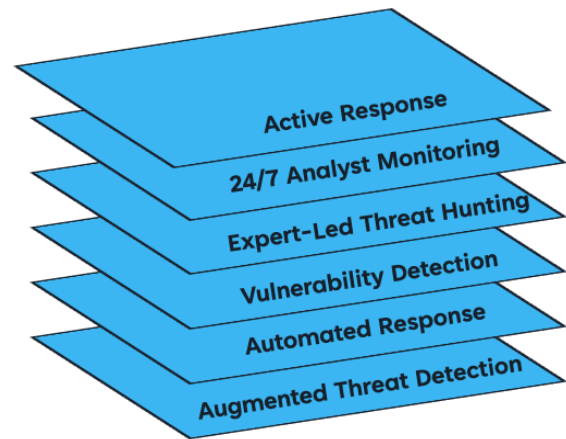

Aspire Wealth has several layers of 24/7 cybersecurity to prevent attacks. This approach is key, since if one line of defense does not catch a threat, there are additional layers that work to catch and stop the threat before it can impact any systems.

This is especially important today, as hackers are constantly adapting their methods. Your data is protected from new, unknown types of attacks as well as attacks that can easily get through a single layer of defense such as an antivirus solution.

As an additional layer of protection, Aspire Wealth's cybersecurity posture is supported by a 24/7 team of cybersecurity analysts who assist in monitoring, investigating threats, and who are always at the ready to respond to and isolate threats if needed.
